

Dear Election Committee,

My name is Noah Kim, and I am running for a Senate At-Large position. I am a first-year mechanical engineer major and want to become more involved with student organizations, events, and clubs. In my short time here so far, I have realized that most first years do not understand the extent of the campus resources they have available to them. Many of the clubs are not well advertised and many of the events for academic development are not utilized. My experience as an intern with the Office of Technology, Innovation and Industry Relations taught me that UC Merced has resources that people have not taken advantage of. My goal is to connect more students to the school and what it has to offer. I hope to learn more about student government and help improve student campus life.

Thank you for taking the time to review my application.

Best regards,  
Noah Kim
