

Why vote for me; you might find yourself asking this question.

My name is Gabriel Castro, I am a second year mechanical engineering major, looking to represent you as a Senator at Large. A little about myself is that I like to walk around and get to know new people, I am friendly and reliable, and I like to learn. As senator I will begin researching ways to make this campus more beautiful. I will tackle issues like waste management on campus, and assure that this campus is sustainable for the future bobcat generations to come. I will work with other senators to tackle information issues, this includes proper management of the bulletin boards, moderating websites and ensuring they are updated, and set the groundwork for reinstating the school newspaper, *The Prodigy*. As your senator I promise my ultimate goal is to make the community at UC Merced closer, and more beautiful than ever before to develop its legacy among the UCs.
